Signals & Systems (ECE)
Home / Signals & Systems (ECE) / Introduction to Signals
Signals & Systems (ECE)
Introduction to Signals
Introduction to Signals
Classification of signals
Continuous time (CT) & Discrete time (DT) signals
Periodic & Non periodic Signals
Random Signals
Deterministic & Random Signals
Even &Odd Signals
Even &Odd Signals:
Bounded &Unbounded Signals
Power and Energy Signals
Elementary signals
Unit Step function
Unit Impulse function
Unit ramp function
How is a signal?
How is a System Represented?
Types of Systems
Causal Systems
Non-causal Systems
Linear & Non Linear Systems
Time Invariant and Time Variant
Linear Time-Invariant System
Stable & Unstable Systems
Stable & Unstable Systems
Static Systems
Dynamic System
Memoryless System
Memory (Memoryless)
Invertible Time Systems
Invertible Time Systems
Causal Property
Causal & Non-causal Signals
Causal & Non-causal Signals
Properties of a System
Properties of a System:
